SPREADS—GEO. M. SNOOK &amp; CO.

**What's the Best DOLLAR SPREAD You have ever seen,**

Said the traveling salesman emphatically, banging the article in question upon the counter. We questioned the statement, as our own dollar Spread was way up in excellence. But a brief comparison proved that the said Spread measured slightly more both ways and was nearly half a pound heavier. We immediately bought two cases of these Spreads. They come in many beautiful patterns, closely resembling Marseilles work, and are fully worth \$1.50 each at **\$1.00.**

Their stay in this store should be a very short one. See them in Market street window.

## THE CITY BUSINESS

Now Demanding Attention Should Have It Promptly.

## A SPECIAL MEETING OF COUNCIL

Called for This Evening for General Business, and It Should have a Quorum—The Purchase of a New Fire Engine and Other Important Matters Will Come Before the Body.

No meeting of council was held last night, as it was understood there would be. When the fire department committee decided to accept the proposal of the Ahrens fire engine company to furnish an engine of its first class for \$1,000 and take the wrecked Atlantic engine off the city's hands, it was agreed to call a special meeting of council to act on the contract, but there seemed to be some objection to meeting before the regular night, which is next Tuesday, and no call was issued. Late last night, however, Mayor Caldwell issued a call for a session this evening. It was issued at the request of the fire department committee, but the call is for "general business," so that anything may be taken up.

Whatever is done in regard to replacing the wrecked engine should be done quickly, as if the Ahrens people do not get the contract they will expect compensation for the use of their substitute engine. There is another reason for accepting their offer quickly, if at all. The company has an engine similar to the one it is proposed to buy here about completed. It was built for the Cincinnati fire department, but it is said if Wheeling orders it the Cincinnati people can be induced to wait and this city can have her new engine in service in thirty days from the time the order is placed. If the other engine is painted up and delivered to Cincinnati it will require about ninety days to construct a second one for this city.

Another matter which might suggest the need of a full attendance at the special meeting of council to-night is the pending ordinance appropriating the ten-cent levy fund to the different improvements about town. The sooner this ordinance is passed, the sooner the board of public works can begin work on the sewers, paving, etc., furnishing employment to many men and assuring the completion of the work before the season is ended. The great difficulty has been in past years that work was commenced so late that it had to be rushed through in the fall, or allowed to go over till another season.

In addition to all this is the proposed city loan ordinance. It will require three or four months, probably, after such an ordinance is adopted by council to submit it to the people and have it ratified and the bonds issued and sold, so that it will be well on in the fall before the money can be available. Every week counts in a matter of that sort, and there should be a full attendance this evening to push all these matters along.
